#### Color Codes - Dosage For White Mortar

Each color is assigned a unique code name consisting of Latin letters and numbers. The Latin letters correspond to the 10 selected colors of ISOMAT DECO-COLOR pigments, while the numbers indicate the quantity of 50 g pigment bags to be added to 25 kg of white mortar in order to achieve the desired color result.

For example, for E2-L1 you would need 2 bags of E (Ocher) and 1 bag of L (Light Brown) for 25 kg of white mortar.
